World's Biggest Wind Farm

BMS is extremely proud to have been awarded the contract to film all elements of the construction of the first 630MW phase of London Array which will become the world's largest offshore wind farm. It is being built 12 miles out to sea in the outer Thames Estuary. Filming begins early next year.

Happy New year!

BMS is to make another free film for charity.

Last year we made our first pro bono video which was shown at a charity fund raising ball in support of two autism charities.

Last Year's Film

Public Relations Film

Adam Hart-Davis has fronted a film by BMS for Peel Energy about the building of their 20MW Biomass Fired Power Station on the banks of the Manchester Ship Canal.

Click the pic to see the film!

There are - of course - a few teeny hurdles to cross; the main one being that the film should support a charity that otherwise would not be able to fund a video of its own.

So, if you have a charity close to your heart and you think they might be able to use a fab BMS video to help their cause, then you will find more information at a couple of BMS place... either by "liking" us on Facebook or by joining our network on LinkedIn.

OFQUAL Comms

The office for standards in UK qualifications, OFQUAL, has appointed BMS to assist with its comms strategies including media training.

The contract was won in open tender and the first sessions take place at the BMS Media Centre in Nottingham from January to March 2011.

"It is a privilege to work with such a high profile organisation," says BMS director Andy Hitchcock.

ISO 14001

BMS has been awarded ISO 14001 the international standard for excellence in environmental practices. BMS now matches the very highest standards of many of our clients.
